

Completed: SOC L1 – Alert Triage (TryHackMe)

I successfully completed the SOC L1 Alert Triage room on TryHackMe, where I gained hands-on experience in handling and analyzing security alerts in a Security Operations Center (SOC) environment.

Key Learnings:-

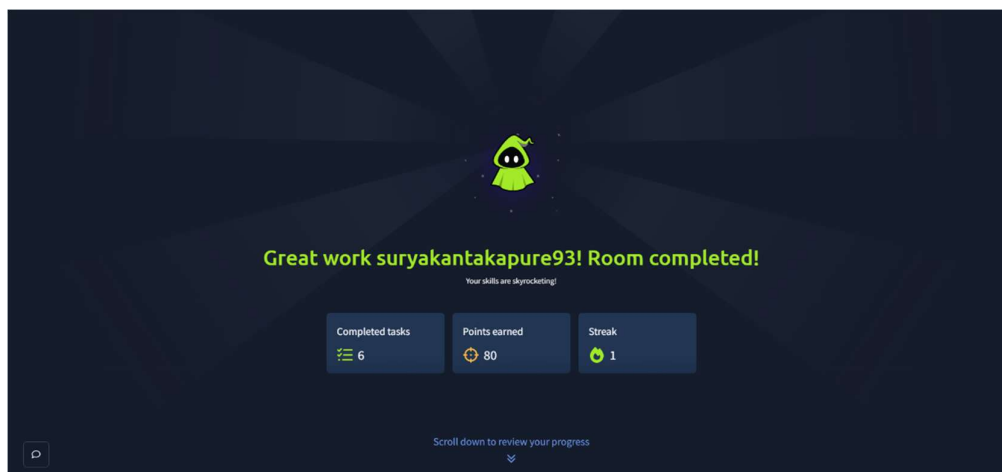

- 1) Understanding how SOC Level 1 analysts monitor and triage security alerts
- 2) Analyzing logs from SIEM tools to identify suspicious activity
- 3) Differentiating between true positives, false positives, and benign alerts
- 4) Investigating alerts related to phishing, brute-force attempts, malware activity, and suspicious logins
- 5) Documenting incidents clearly for escalation to Level 2 analysts

Skills Practiced:-

- 1) Log analysis
- 2) Incident categorization
- 3) Basic threat detection
- 4) Following incident response procedures
- 5) Attention to detail & analytical thinking

This room strengthened my understanding of how real-world SOC teams detect and respond to cyber threats in an enterprise environment.

Looking forward to exploring more blue team labs and improving my defensive security skills!
