

Completed: - TryHackMe SOC – Junior Security Analyst Lab

I recently completed the “SOC — Junior Security Analyst” lab on TryHackMe, gaining hands-on experience with real-world Security Operations Center tasks.

This lab helped me strengthen my understanding of:-

- ✓ SOC fundamentals and analyst responsibilities
- ✓ Investigating security alerts & analyzing logs
- ✓ Understanding SIEM workflows
- ✓ Identifying malicious activity using threat intelligence
- ✓ Applying blue-team methodologies to detect and respond to threats

This was an excellent practical learning experience that improved my defensive security skills and gave me a deeper insight into how SOC teams manage and resolve incidents.

Proud to share this milestone as I continue my journey in cybersecurity! 🚀🔒
