

✓ LinkedIn Post:- SOC Role (Blue Team) – TryHackMe Lab

🚀 Completed the “SOC Role – Blue Team” lab on TryHackMe!:-

This room gave me a solid understanding of how Security Operations Centers (SOC) work and what responsibilities a Junior Security Analyst handles on a daily basis.

🔍 ♦ Lab Overview:-

The TryHackMe SOC Role room introduces core blue-team concepts and explains how SOC teams detect, analyze, and respond to cyber threats.

I explored how different SOC tiers operate, what tools analysts use, and how incidents flow through the SOC.

💡 ♦ My Learnings from the Lab:-

1 Understanding SOC Structure:-

Tier 1 (L1) – Monitors alerts, triages, escalates incidents

Tier 2 (L2) – Deep investigation, malware analysis, threat hunting

Tier 3 (L3) – Advanced forensics, creating detection rules, tuning SIEM

SOC Manager – Oversees SOC operations & incident lifecycle

2 Daily Responsibilities of a SOC Analyst:-

Monitoring SIEM alerts

Investigating suspicious IPs, domains, and user actions

Writing incident reports

Performing log correlation

Blocking malicious activity

Supporting incident response

3 Tools Covered:-

SIEM (Security Information and Event Management)

Used to collect, search, and analyze logs

EDR/XDR for endpoint detection
Threat Intelligence Platforms
Firewall/IDS dashboards

How an Incident Flows in a SOC:-

Alert Triggered →
L1 Verifies the alert →
Escalation to L2 if suspicious →
L2 detailed investigation →
Containment & remediation →
Reporting & closing the ticket

♦ Why This Lab is Valuable:-

This room strengthened my understanding of:
How blue teams actually work in real organizations
The lifecycle of security alerts
How SOC analysts detect and stop real-world threats
Industry-level workflows & documentation practices

Key Takeaways:-

- ✓ SOC is the backbone of enterprise security
- ✓ Incident analysis needs attention to detail
- ✓ SIEM triage is a core skill for blue-teamers
- ✓ Threat intelligence is crucial for decision-making
- ✓ Communication & reporting are as important as technical skills

🎉 Proud to Level Up My Blue-Team Skills!:-

This lab gave me hands-on knowledge that aligns with real SOC duties — great for anyone preparing for SOC Analyst, Blue Team, or Cybersecurity Analyst roles.

You did it! 🎉 SOC Role in Blue Team complete!
